AllIMS Main Road, Phulwari Sharif, Patna 801505

Website: www.iogs.org | Email: enquiries@iogs.org | Tel: 73 690 42 996/997/998

COURSE DETAILS

The Insulation Inspector IOGS/CII Level 3 course will broaden your knowledge of thermal insulation and prepares you for the next level of thermal insulation inspection and quality control/assurance. The course takes you from basic (level 2) to advanced level of thermal insulation inspection and QA/QC and covers everything you need to know for a successful career in the thermal insulation work field of the oil and gas, petroleum, and petrochemical industries.

For your convenience, we are offering our insulation inspector level 3 course via the virtual platform which you can take from anywhere at a specific date and time using an internet-enabled device such as a desktop/laptop, tablet, or smartphone.

The course runs for 2 days and is led by an IOGS-appointed tutor who has a proven track record of instilling knowledge with a practical, friendly, and interactive approach.

WHO SHOULD PARTICIPATE

The Course is Suitable for:

- QA/QC INSPECTORS
- SUPERVISORS
- ENGINEERS
- MANAGERS
- TPI'S

CLASS TIMING

9:00AM - 5:00PM

COURSE SCHEDULES: 24 - 26 Apr, 2024@Patna | 07 - 09 Jun, 2024@Chennai | 22 - 24 Aug, 2024@Patna

MAJOR COVERED TOPICS

- Purpose of insulating pipes, vessels, tanks, etc.
- The 3 common categories of thermal insulation material
- Physical forms and their use
- Differences between hot, cold, acoustic, and PP systems
- Insulation layering based on the thickness and operating temperature
- The use of liquid, membrane, and foil vapor barrier
- The use of joint sealant and vapor stop
- The differences between anti-sweat, cold, and cryogenic insulation systems
- Liquid-applied thermal insulation coating (GSPU, Novolastic, etc.)
- Advantages of metallic and non-metallic protective jacketing
- Why we don't use screws in cold systems, and what alternative options are available
- Corrosion under insulation (CUI) and Chloride Stress Corrosion Cracking (CLSCC) Consequences
- Reasons why CUI is one of the major problem, and is it really responsible for the plant shutdown/downtime.
- Risk-based inspection to avoid the insulation needs.
- Visible and invisible effects due to the improperly installed insulation system
- Insulation system maintenance
- Inspection instruments and their use
- Applicable standards and manuals
- Insulation inspection and QA/QC
- Insulation inspector's duties and responsibilities
- Commonly encountered issues and their remedial actions
- Documentation and reporting requirements
- Practical session/assessment
- Health and safety considerations

ELIGIBILITY REQUIRED

- IOGS/CII Level 2
