

FIREPROOFING INSPECTOR LEVEL 2

[PLAY COURSE OVERVIEW VIDEO](#)

Steel is a widely used material in the oil & gas industries, which works with a number of highly combustible materials. Because, no industry is more prone to fire-related accidents than oil & gas, the industry uses the passive fire protection (PFP) methodologies to protect the steel from fire. PFP keeps the steel's integrity intact for a certain period of time and prevents it from collapsing prematurely, thereby protecting people, facilities, and equipment from the damaging effects of fire.

The IOGS/CFI Level 2 Fireproofing Inspector course will educate you about the use of passive fireproofing in oil & gas industry and develops your passive fireproofing inspection and quality control work skills.

DEVELOP

ACHIEVE

ADVANCE

Gain the skills necessary to apply for jobs in the oil & gas industry's passive fireproofing work field

Achieve a symbolic qualification and enhance your resume to stand out from the crowd

Advance your career towards achieving your personal and professional goals

WHY STUDY WITH IOGS?

1

CONVINIENT

You can study ONLINE with IOGS, which allows you to learn from home, work, or while traveling.

2

AFFORDABLE

Our courses are 50 to 60% lower in price than similar training courses provided by other training providers. In addition, when compared to traditional classroom-based courses, learning online saves an average of 50% on venue and travel costs.

3

FLEXIBLE

You can study at your own pace and whenever it is convenient for you. You can also create your own timetable for your study to balance your work and lifestyle.
